

608-663-7188 22 E. Mifflin St., Ste. 900 Madison, WI 53703 forward-analytics.net

The data in the table below are a supplement to the Forward Analytics' report <u>"A Funding Choice: Mixing Public & Private School Funding."</u> The information below is better understood after reading the report.

The figures show the modeled impacts of a decoupling of the current funding mechanisms for statewide and Racine school choice, the special needs scholarship program, and independent charter schools. Currently, students in these programs and their costs are included in the public school general aid formula. They are also accounted for in the revenue limit formula.

Decoupling is the removal of these students and their costs from these two public school formulas. To simulate the effects of decoupling, 2024-25 revenue limits and equalization aid are recalculated excluding Choice/SNSP/ICS students. In other words, this simulation shows what 2024-25 school finances would have looked like if a full decoupling were in place and these programs were funded by a separate GPR appropriation.

It is important to understand that all simulations are using 2024-25 data and show the general direction of changes. Under an actual decoupling, enrollments and school costs change, affecting revenue limits and aids. The actual decoupling would only look similar to what is presented here.
